I think end of April would be fine, say April 27th? Thanks,

Subject: Question on QA data of AQS report for 2nd Qtr 2011

Hi Bob, I would like to add this request to the task list, but I wasn't sure who to assign it to. We get the AQS reports from James, but didn't now if this request would go to Lee or James. Let me know who I should send it to and I'll add it to the task list.

Thanks!

After reviewing the AQS Report from 2nd Qtr 2011, we would like to see if you could look in to a particular monitor reading for any potential QA issues. Some background, we are expecting an EE request from KS related to ozone data in the April 2011 time frame, and we noticed that the Watkins Mill monitor had an exceedance on April 13th. This is the same date that KS has flagged as one of their EE requests for the Konza Prairie monitor in Manhattan. MO isn't planning on flagging this data. We found it interesting that there were no other KC metro area monitored

exceedances on or around this date if the exceedance was due to flint hills.

So, were are just doing an additional inquiry to see if you can see any potential QA issues or reasoning behind this.

Thanks!
